Case No: 1:20-cv-07803

PATENT CASE

COUNTY OF DALLAS

)

)

STATE OF TEXAS

)

AFFIDAVIT OF JAY JOHNSON

I, Jay Johnson hereby declare and state as follows:

- 1) The party against whom judgement is sought is not an infant, incompetent, or in military service.
- 2) On September 22, 2020, Plaintiff ("Display") filed a complaint against Cloud4Wi, Inc. ("Defendant") alleging infringement of U.S. Patent No. 9,300,723 (the '723 Patent) titled "Enabling social interactive wireless communications," by Defendant's Proximity Marketing system, and any similar products.
- 3) Service was properly effectuated by serving Defendant at The Corporation Trust Company located at The Corporation Trust Company at 1209 Orange St., Wilmington, DE 19801 on October 5, 2020.
- 4) Defendant was required to file an answer to the complaint on October 26, 2020.
- 5) Defendant has defaulted in the appearance in the action because to date, it has not filed an answer or otherwise responded to the complaint.

- 6) On March 9, 2021, the Clerk of the Court issued the Clerk's Certificate of Default.
- 7) In evaluating damages for patent infringement, several factors must be examined, including but not limited to:
 - a. The Defendant's use of the technology that the subject patent covers, and
 - b. The Defendant's revenue derived from that usage.
- 8) According to Defendant's YouTube video demonstrating its Proximity Marketing tutorial, Defendant has been using its technology covered by '723 Patent at suit since at least June 14, 2014. *See*, **Exhibit A**.
- 9) Per ZoomInfo.com, Cloud4Wi, Inc, has an annual revenue of 5 million dollars. *See*, **Exhibit B**.
- 10) Crunchbase.com, Cloud4Wi, Inc has raised a total of 18.1 million dollars in funding to date, their latest funding being raised in series on February 18, 2020, October 2, 2017 and February 18, 2014. *See*, **Exhibit C**.
- 11) Based on figures from www.owler.com obtained on July 1, 2021, Defendant has an Estimated Annual Revenue of 10 million dollars per year. *See*, **Exhibit D**.
- 12) Without the benefit of discovery from Defendant and based on information and belief including **Exhibits A through D**, Display believes that Defendant has relied upon and utilized the technology embodied in the '723 Patent for a substantial portion of Defendant's business. *See*, **Complaint at ¶¶11-25**.
- 13) It is generally well-known and accepted that average royalty rates for patent licensing range from 3 to 6% of gross sales. Moreover, these rates are consistent with the information that the Plaintiff has been aware of for many years.

14) Based on the foregoing, Display believes a reasonable royalty in this case can be calculated as follows:

a. Defendant utilizing the technology embodied in the '723 Patent to produce 25% of its revenue. That revenue is 11 million dollars per year (using the median, 11 million dollars of the range of 5 to 18.1 million dollars per year as per **Exhibits B and D**).

b. Defendant should be assessed a conservative 3% royalty on its usage.

c. Defendant's usage of the asserted technology has existed for at least 3 years.

See, Exhibit A.

d. Based on the above factors, Display calculates a reasonable royalty of \$630,000.00 U.S.D solely for past infringement over the last 3 years.

e. Attorney's fees and costs in this case is \$10,000.00 USD.

f. Thus, reasonable royalty as calculated above is \$630,000.00 plus \$10,000.00 [attorney's fees and costs], equaling \$640,00.00.

15) Alternatively, Display has previously licensed the '723 Patent, ranging from one-time payments of \$10,000.00 to \$130,000.00 U.S.D. in exchange for a license for the life of the '723 Patent.

16) Thus, Display believes that the appropriate measure of damages should be \$640,000.00 [\$630,000 + attorney fees and costs], but no less than \$130,000.00 U.S.D.

17) This amount sought is justly due and owing, and no part has been paid.

Executed on July 26, 2021.

Jay Johnson

Sworn to and subscribed before me, Jeannine Jiral,
this 26th day of July, 2021.

NOTARY PUBLIC/STATE OF TEXAS

Cloud4Wi Proximity Extends WiFi Marketplace Platform with Precisely Targeted Marketing Campaign Capability

June 17, 2014

Cloud4Wi introduces Cloud4Wi Proximity, a new application for venues to quickly deliver targeted, localized marketing campaigns to customers

SAN FRANCISCO – June 17, 2014—At the Wi-Fi Offload Summit, Cloud4Wi, the leading provider of next-generation cloud Wi-Fi platforms, will announce the release of Cloud4Wi Proximity, a new application for venues to quickly and easily deliver targeted, localized marketing campaigns to customers. Cloud4Wi executives will present details about the application at the Wi-Fi Offload Summit at Four Seasons Silicon Valley in Palo Alto. The Cloud4Wi Proximity application

location-based and timed marketing campaigns that offer instant feedback and drive revenue.

Clicktotweet: @cloud4wii Proximity Extends Wi-Fi Marketplace Platform with Super-Targeted Marketing Campaign Capability #WiFi #marketing

Using a wizard approach, Cloud4Wi Proximity guides users through a simple four-step process for defining the campaign: 1) select a triggering event such as a site visit, a sign-in or a logout; 2) narrow the target of the campaign by specified conditions including demographic profile, device or time of day; 3) select appropriate channels for delivery such as SMS, email and/or social media; and 4) choose customized content, which can deploy images, rich text, video, coupons, surveys—whatever supports the message of the campaign. The Cloud4Wi Proximity application is also designed to capture valuable end-user demographics and purchasing patterns to provide venues with the metrics they need to strengthen brand promotion and make direct marketing campaigns more successful and cost-effective.

"Using Cloud4Wi Proximity, Wi-Fi venues can finally be rewarded for the connectivity service they provide—often for free—by setting up highly targeted, localized marketing campaigns quickly and with minimal effort," said Ivan Muccini, Vice President of Product Planning at Cloud4Wi. *"For example, when a diner logs on to a restaurant's free Wi-Fi using Facebook and then finishes lunch and leaves, restaurant management can automatically send a SMS thanking her and offering a promotion for the next visit or a short survey about the dining experience. Proximity dramatically shortens the feedback cycle, thus delivering business value in real time."*

"Cloud4Wi is one of the most promising cloud-based Wi-Fi service platforms that I've seen," said Claus Hetting, mobile industry analyst and chair of the Wi-Fi Offload Summit. *"In my view, Cloud4Wi is tackling the Wi-Fi monetization challenge in all the right ways. Right now, it is possible to add a great deal of value to a variety of public venues with managed Wi-Fi solutions like those of*

Ivan Muccini and Brodie Kirkeby, Vice President of USA Sales, will present the Cloud4Wi Proximity application during Monetization Day at the Wi-Fi Offload Summit on Wednesday, June 18 at 2:15 p.m. PDT. For more information about Cloud4Wi or Proximity, please contact info@cloud4wi.com. To schedule a face-to-face meeting at the Wi-Fi Offload Summit in Palo Alto, contact Brodie Kirkeby at bkirkeby@cloud4wi.com or call (949) 887-0636.
